Re: Letter of Recommendation

To Whom It May Concern:

G+G Partnership Architects has worked closely with Gibbs Wilson Contracting Inc., as the General Contractor on several projects at the London Health Sciences Centre in London, Ontario. We have no hesitation in recommending Gibbs Wilson Contracting Inc. and in particular their people, to any client as a General Contractor for future projects.

Gibbs Wilson Contracting Inc. are nearing completion of another interior renovation at the Victoria Hospital, London Regional Cancer Program. This has been a successful project from the client's point of view.

Mr. Peter Nott as Project Manager has demonstrated a good sense of management skills in all areas; the projects have been organized and expedited in a professional manner. Mr. Brad Armstrong, as Site Superintendent has demonstrated a keen commitment and good sense of organizational skills. The Site Personnel have been well coordinated and the project completed in a professional manner. The quality of the workmanship and skill is also worthy a mention.

If you require any further information, please contact the writer.

Yours sincerely,

G+G Partnership Architects

Dino DiMurro
Dipl. Arch. T., MAATO
